

# Advanced Inventory\*

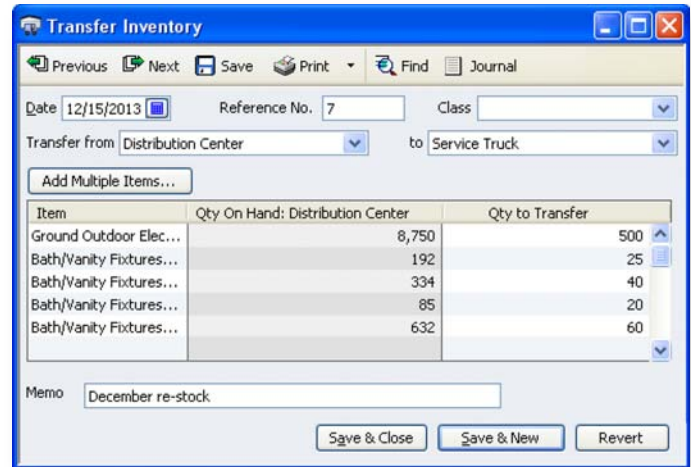

Intuit® QuickBooks® Enterprise Solutions 11.0

## Track Inventory in Multiple Locations

Manage your inventory more efficiently with these sophisticated inventory capabilities:

- **Know the value and quantity of inventory in multiple locations.** For each location, you can see how many items are on hand, on sales order, on purchase order, and your reorder point... and QuickBooks will automatically calculate which items you need to restock.
- **Transfer inventory from one location to another.** If one location is running low on inventory, you can transfer stock from another location to meet demand without delay.
- **Flexibility to set up various types of locations.** In addition to tracking inventory in multiple warehouses, you can track it in different staging areas within a single warehouse, on service trucks, and on consignment. You can even track imported goods 'on the water.'

Easily transfer stock from one location to another.

Quantity on Hand by Site		Inventory	
	Atlanta Warehouse	San Jose Warehouse	TOTAL
<b>Inventory</b>			
<b>Cabinets</b>			
Cabinet Pulls	273	150	423.00
Light Pine	3	3	6.00
Cabinets - Other	-1	-1	0.00
Total Cabinets	275	154	429.00
<b>Door Frame</b>	17	4	21.00
<b>Hardware</b>			
Brass hinges	134	112	246.00
Doorknobs Std	36	88	124.00
Lk Doorknobs	88	34	122.00
Total Hardware	258	234	492.00

Know the value & quantity of inventory in multiple locations—plus QuickBooks automatically calculates which items you need to restock.

Available as an add-on subscription for just \$699 per year.

\*Requires QuickBooks Enterprise Solutions 11.0 with an active Full Service Plan and an Internet connection.
