

Credit Card Processing

Sage MAS 500 Credit Card Processing powered by Sage Payment Solutions gives Sage MAS 500 ERP customers the benefits of comprehensive business management coupled with the benefits of credit purchase processing — all from Sage Software. What's more, having all payment processing in-house with Sage Payment Solutions enables Sage Software to pass savings on to our customers, resulting in a lower total cost of ownership.

Studies show that more and more purchases are being made with credit cards each year, and vendors accepting credit cards increase their sales by 15 to 50 percent. Sage MAS 500 customers can take full advantage of this opportunity with the ease and efficiency offered by fully integrated credit payment processing.

Credit Card Processing provides a complete credit card processing solution for mail order, telephone order, and Internet businesses. Data can be entered through the Sales Order and Accounts Receivable modules. Transactional information, such as authorization codes, is captured and stored for historical and reconciliation purposes. Fraud prevention features protect both you and your customers from unauthorized credit card usage.

BENEFITS:

Leverage Sage Payment Solutions as the processor

Automatically connect to merchant accounts for credit card authorizations and settlements

Process payments using Sales Order and Accounts Receivable modules

Complete, secure, 24/7 online transaction reporting

Stored credit card numbers are encrypted within Sage MAS 500

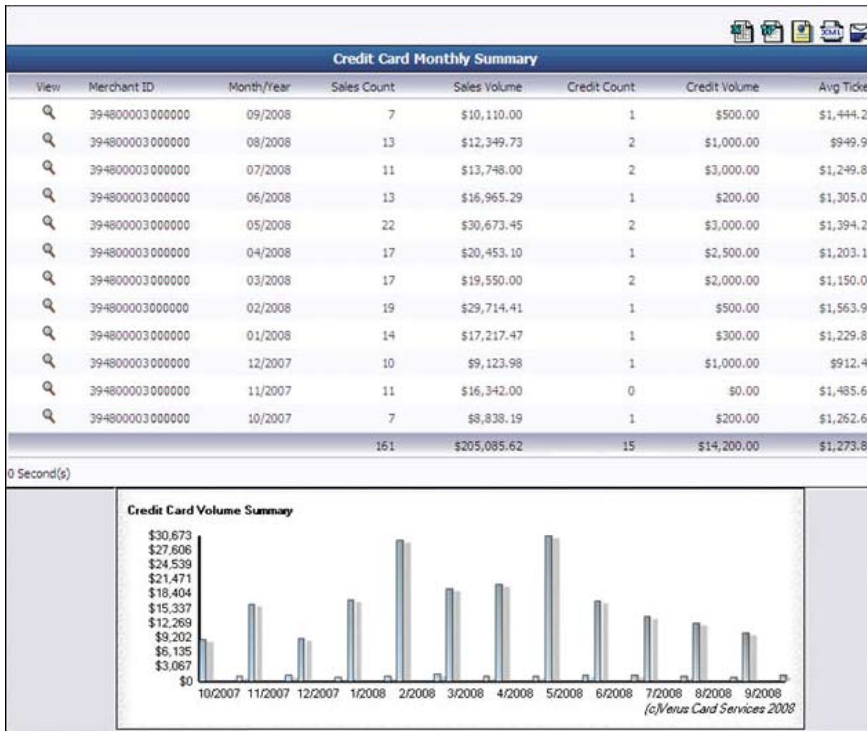

Credit Verification Value (CV2) is fully supported to help verify card authenticity

Compliant with Visa and MasterCard Payment Card Industry (PCI) data security standard

Multiple address verification options add an additional layer of credit card authentication

Security permissions control access to credit card information

◀ Sage Payment Solutions increases operational efficiency with full online reporting, including historical data.

Comprehensive reports allow you to see:

- Settled batches
- Deposit amounts
- Statements (current and historical)
- Chargebacks
- Transaction history
- Returns and credits
- ACH information

FEATURES

Sage MAS 500 Interface Points

Sage Credit Card Processing adds functionality in key areas of Sage MAS 500, including Sales Order Entry, Payment Entry, Invoice Entry, Invoice Processing, Cash Receipts, Down Payments, Customer Returns, Customer Maintenance, Tender Types, and Security Groups.

Credit Verification Version 2 (CVV2)

CVV2 helps verify card authenticity by validating that purchasers do, in fact, have the card in their possession, which helps reduce chargebacks for e-commerce and mail order purchases.

Address Verification Services

Address verification services add another layer of credit card authentication by comparing the purchaser's billing address with the billing address on record.

User-Level Data Security

Use Customizer to control access to sensitive data by making credit card information read-only or hidden for selected users or groups.

Data File Encryption

The system's data file encryption capabilities further increase the security of customer data by enabling you to encrypt credit card account numbers in the database.

Merchant Account provided by Sage Payment Solutions

Sage Payment Solutions has made it easy for businesses to accept electronic payments for more than 17 years. Funds collected from credit card transactions are automatically deposited into your existing business bank account.

Online Reporting

Secure online access to all your key transaction information is included for your merchant account, 24/7, at www.myvirtualreports.com.

End-to-end solutions. Expert advice. Ongoing support. That's Sage 360®.

Sage Software supports the needs, challenges and dreams of nearly 2.9 million small and medium-sized business customers in North America through easy-to-use, scalable and customizable software and services. Our products support accounting, operations, customer relationship management, human resources, time tracking, merchant services and the specialized needs of the construction, distribution, healthcare, manufacturing, nonprofit and real estate industries. Sage Software is a subsidiary of The Sage Group plc, a leading global supplier of business management software and services to small and medium-sized businesses. Formed in 1981, Sage was floated on the London Stock Exchange in 1989.
